

Dawar Ali

Senior DevOps Engineer

+91 9070055333 | iamdawarali@gmail.com | [linkedin.com/in/dawar-ali-devops/](https://www.linkedin.com/in/dawar-ali-devops/)

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6+ years of experience automating, securing, and optimizing mission-critical cloud deployments in AWS. Skilled in Kubernetes, Terraform, Jenkins, GitLab, Docker, CI/CD automation, infrastructure as code, observability, and security-focused DevOps practices. Experienced in IT team leadership, application administration, audit support, DPDP readiness, and integrating AI tools into engineering and administration workflows.

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

ixigo

April 2026 – Present

Gurugram, Haryana, India

- **Cloud Platform Ownership:** Took ownership of production AWS platform operations, driving Kubernetes-based infrastructure improvements for resilient, secure, and scalable microservices workloads.
- **Infrastructure as Code:** Standardized cloud provisioning and environment changes with Terraform, improving repeatability, governance, and control across infrastructure updates.
- **Delivery Automation:** Advanced Jenkins and GitLab CI/CD workflows to support faster, more reliable releases; introduced AI-assisted review practices to strengthen engineering quality gates.
- **Technical Leadership:** Guided IT and DevOps initiatives across multiple lines of business, aligning platform priorities, operational practices, and stakeholder expectations.
- **Enterprise Administration:** Led administration of Google Workspace, Slack, Jamf, and JumpCloud, while integrating AI-enabled tooling to improve productivity and operational support.
- **Security and Compliance Governance:** Partnered with security teams to embed vulnerability checks, support audit readiness, and contribute to DPDP compliance preparation.
- **Edge and WAF Security:** Tuned Cloudflare WAF policies and application-layer protections to reduce exposure, improve request filtering, and strengthen web application defense.
- **Reliability Engineering:** Enhanced observability with Loki-based logging and monitoring workflows to improve visibility into platform health, availability, and incident investigation.
- **Technologies:** Kubernetes, Terraform, AWS, Jenkins, GitLab, Docker, Google Workspace, Slack, Cloudflare, Loki, Jamf, JumpCloud.

DevOps Engineer

ixigo

April 2022 – March 2026

Gurugram, Haryana, India

- **Infrastructure Management:** Managed and maintained AWS infrastructure using Kubernetes to support secure, scalable, and reliable microservices-based application environments.
- **CI/CD Pipelines:** Designed and maintained robust continuous integration and deployment pipelines using Jenkins and GitHub, facilitating seamless code integration and deployment.
- **IT Team Management:** Managed IT teams across lines of business to ensure aligned technology strategies and smooth operational delivery.
- **Applications Administration:** Managed Google Workspace and Slack for organization-wide communication and productivity.
- **Security Practices:** Integrated security tools within development workflows to assess and mitigate vulnerabilities, supporting compliance with industry standards.
- **Audit and Compliance Support:** Assisted the security team with audits and upcoming compliance requirements related to the Digital Personal Data Protection Act (DPDP).
- **Web App Firewall Management:** Managed Cloudflare application-level WAF settings to enhance web application security.
- **Incident Response:** Established and maintained incident response protocols to reduce downtime and mitigate operational risks effectively.
- **Monitoring and Observability:** Implemented monitoring solutions using Loki to ensure high availability and performance of cloud resources.
- **Vendor Relations and Operations:** Oversaw vendor communications and efficiently managed operational processes.
- **Technologies:** AWS, Jenkins, GitLab, Docker, Kubernetes, Google Workspace, Slack, Cloudflare, Loki, Jamf, ScaleFusion, Bash scripting.

System Administrator

ixigo

July 2021 – March 2022

Gurugram, Haryana, India

- **Server Management:** Maintained and configured all in-house servers, including Cloud VPN, ensuring reliable operations and minimal workflow disruptions.
- **LDAP Integration:** Set up Lightweight Directory Access Protocol (LDAP) using Google services, integrated with Cloud VPN, and enabled Windows and Mac authentication.
- **Infrastructure Optimization:** Managed load balancing with HAProxy, DNS, DHCP, Apache, and Nginx to enhance system performance and availability.
- **VPN Migration:** Migrated the in-house VPN server with user certificates to AWS, improving uptime, availability, connectivity, and security through LDAP integration.
- **Database Security:** Implemented IP-based access control for MongoDB and MySQL databases, enhancing data security.
- **Automation:** Automated manual processes using Bash scripting to increase operational efficiency.
- **DNS/DHCP Configuration:** Configured DNS and DHCP zones to manage network resources.
- **Technologies:** AWS, HAProxy, DNS, DHCP, Apache, Nginx, LDAP, Google Workspace, Windows Authentication, Mac Authentication, MongoDB, MySQL, Bash scripting, Cloud VPN.

System Engineer

ixigo

October 2019 – June 2021

Gurugram, Haryana, India

- **System and Infrastructure Management:** Directed and monitored installed systems and infrastructure, ensuring maximum availability and performance.
- **Availability Assurance:** Maintained high levels of system uptime through continuous monitoring and maintenance strategies.
- **Mobile Device Management:** Administered mobile device management solutions to support organizational mobility and security requirements.

EDUCATION

B.Tech

Islamic University Of Science and Technology

August 2015 – August 2019

Srinagar, Jammu and Kashmir, India

SKILLS

Cloud Platforms: AWS, Google Cloud Platform (GCP)

DevOps Tools: Jenkins, GitHub, GitLab, Docker, Kubernetes, Terraform

Scripting and Automation: Bash scripting, CloudFormation, Ansible

Operating Systems: Linux (Ubuntu, CentOS, Red Hat), Windows

Networking and Security: Network security, SSL/TLS, VPN setup, firewall configuration

Monitoring & Observability: Loki, New Relic, Prometheus

Applications Administration: GitLab, Google Workspace, Slack, Cloudflare, Jira, Jamf, JumpCloud

Soft Skills: Problem-solving, effective communication, cross-functional collaboration, team leadership

CERTIFICATIONS

AWS Certified Cloud Practitioner

Certified Kubernetes Administrator (CKA)
